

Online course for English teachers

# Classroom management and routines in English lessons

## Discover the power of routines in children's learning!

Routines help them navigate through expectations, enabling better preparation and activation of prior knowledge. When infused with catchy songs and rhymes featuring simple language, children grasp a wealth of useful vocabulary. In games, they get to know each other's names, solve possible behavioural troubles and learn to cooperate and thrive.

So why not apply this to English teaching too?

Let's meet texts that help children in adapting to daily routines and help them acquire new vocabulary, phrases, idioms, and grammar.

Join our webinar and explore the magic of routines in language learning!

- The importance of a regular routine, its implementation throughout the day, and its benefits for children
- Ideas for community circles
- Proven techniques for starting and ending the day, lessons, the school year, and performances
- Activities for getting to know children by their names, ages, and birthdays
- Organization of routine activities, self-care, hygiene, and cleaning
- Tips on quickly and smoothly forming pairs, groups, circles, or lines
- Methods for capturing attention and engaging students during educational activities
- Support for friendly relationships, emotion management, and positive atmosphere

The link will be sent to your email address (write it carefully please) on the day of the webinar.
